ABSTRACT

The Department of Regional Human Resource Development (BPSDMD) of Central Java Province is a government agency that has the task of providing education and training for the State Civil Apparatus in the Provincial Government of Central Java. Supporting these activities cannot be separated from using of facilities and infrastructure. The management of the building in BPSDMD of Central Java Province has been managed manually. Therefore the need for an information system that can manage the use of building and maintenance of buildings related to inventory of goods in it. One of the efforts to overcome the problem is to build management information system in BPSDMD of Central Java Province. Making this application using PHP programming language and MySQL database. The purpose of making this information system is formatted of systems that can produce information and management of buildings in BPSDMD Central Java Province quickly, accurately and efficiently

Keywords : Building Management System BPSDMD of Central Java Province, PHP, Mysql.
