ABSTRACT

Language can be interpreted as a tool for intuition or a tool for communication in the sense of a tool for conveying thoughts, ideas, concepts or feelings. Scientific studies of languages called acquaintance with regional languages vary from time to time, and its evolutionary history can be reconstructed by comparing modern languages to determine which languages the ancestors should have, so that language changes take place later. A group of languages derived from a common ancestor is known as a nationality. This study aims to produce dictionary applications of Indonesian, English and Sasak. Using the waterfall system development method, this dictionary of languages can make it easy to communicate with each other when traveling to certain countries and Lombok, for minimal android platform using version 4.0 (Ice cream sandwich) and the lack of this 3 language dictionary application has not been able to translate the sentence.

Keywords: Language Dictionary, Lombok Sasak, Android.
