ABSTRACT

PT. Kaisa Rossie Tour and travel is one of the companies which focuses on umrah and haji service. The obstade of this company is there's manual process to take notes in process of including the umrah and haji data. Which still using a book everyday, it has ,high risk for a long time to create and check the data. The data that has been entered can be burn or lost moreover, the auditing process will need longtime to look for all the data. That's why the company has to make list and all the data easily in every customer's transaction. This system will be made of the Visual Basic.net 2010 using database of Microsoft Access 2007 and the report is using Microsoft Excel 2007. This system is hoped to make the process of checking the report easily, monitoring all the stock, and also reporting that can be sorted by data, and number's transaction, which can manage the company to check and audit the data periodicly and easily.
